

Logan McCarthy

loganrileymccarthy@gmail.com | loganrileymccarthy.com | github.com/loganrileymccarthy

Skills

CAD/CAM: SolidWorks, Mastercam; 5+ years combined experience

Programming: G-code, Javascript/HTML/CSS, C++; 10+ years experience

Operating: Haas controller; 5+ years. Fanuc, Heidenhain controller; 3+ years. Mitsubishi EDM; 2+ years.

Metrology: MicroVu programming and operation, Zeiss Contura/Calypso CMM operation, digital/analog hand tools.

Experience

Machinist Level 1, Level 2, Level 3, Protofab Inc. – Petaluma, CA Dec 2022 – Present

- Setup and completed one-off operations on large parts independently.
- Proved out preexisting programs without instructions, creating instructions for future operators.
- Managed tool maintenance and adjustments on 2 machines cutting a part around the clock for over one year; handling CMM reports, logging changes, and identifying microscopic discrepancies.
- Improved workflow for program version control and handling.
- Designed and 3d-printed tools for assisting operators.
- Designed toolpaths and created programs for new parts using Mastercam.

Machinist, Lane4 Precision – Santa Rosa, CA Jan 2019 – Dec 2022

- Created programs for Mitsubishi wire EDM, navigating limitations in mill software.
- Ensured conformance to tight tolerances without a QA department.
- Created setup drawings, prepared tools, and ordered material for swiss lathe jobs.
- Gained valuable exposure to proper ERP software practices.

Assistant Estimator, Neary Landscape Inc. – Santa Rosa, CA Jun 2016 – Jan 2019

- Worked alongside lead estimator to prepare for public works landscape construction projects.
- Gained valuable exposure to the costs of materials and services within a competitive industry.
- Created bills of materials, submittals, maintenance instruction booklets, and other required documentation.

Projects

Swiss Lathe Backplotter <https://github.com/loganrileymccarthy/backplot>

- Allows the user to visualize swiss lathe g-code, with multiple viewing angles and windows (W.I.P.).

G-code Editor <https://loganrileymccarthy.com/gcode-editor-v2/index.html>

- Allows the user to create setup sheets and view program information by simply uploading the text file.
- Allows for the addition of complex functionality with a single click, e.g. toggleable tool measurement.
- Aids with timestamping program changes.

Tapping Dashboard <https://loganrileymccarthy.com/cnc-dashboard/index.html>

- Provides the user with calculators and information to quickly write tapping cycles.
- Tables of information taken and organized from Machinery's handbook for easier accessibility.

Education

Santa Clara University – Withdrew, Mechanical Engineering 2016

Sonoma Academy – High School Diploma 2013
